***CALIFORNIA PROPOSITION 65 WARNING**

Proposition 65, also known as the Safe Drinking Water and Toxic Enforcement Act of 1986 was enacted as a California ballot initiative in November 1986. The Proposition was intended by its authors to protect California citizens and the State's drinking water sources from chemicals determined by a state agency to cause cancer, birth defects or other reproductive harm.

Over 900 chemicals are now on California's list of Proposition 65 chemicals.

Prop 65 requires that a "clear and reasonable warning" be provided by a Company in the course of doing business, who manufactures, assembles, handles, distributes, stores, sells, or transfers a consumer product which he or she knows to contain a chemical known to the State to cause cancer or reproductive toxicity to any person to whom the product is sold or transferred.

Because we cannot test every piece of every order that we ship to California for every one of the Prop 65 listed 900 chemicals, you may continue to have concerns about compliance with Prop 65. If so, the safest option is to include a label on product that may ship to the State of California. We will do this for a nominal fee.

The label would read as follows:

WARNING:

This product contains chemicals known to the State of California to cause cancer, birth defects or other reproductive harm.
