## HOW THE PICQUIC INSTANT-BIT-CHANGE SYSTEM WORKS:

Each screwdriver stores a set of driver bits in a solid ergonomic handle. Unlike traditional screwdrivers, the unique Picquic system allows for bit storage and selection to occur at the same time. This simple but ingenious design feature allows you to swap out bits for the task at hand, while keeping the ones not in use safely stored.

### In-use:

To use simply insert the working bit into the magnetic shank area, and start driving.

### Pocket-friendly:

Extra bits are stored in the rear of the handle keeping any bit you need organized and at the ready.

### Instant bit-change system:

Pushing a bit into the rear automatically ejects the next bit selected.

## PROP. 65:

Prop 65 was created through the ballot initiative process and was intended to inform California citizens by requiring a warning when a product contains one of 900 substances designated by the state as potentially causing cancer, reproductive harm, or birth defects. A Proposition 65 warning label does not mean a product violates any health or safety rule. Although the Prop 65 is not new, the regulations implementing it have changed, which may change how we provide warning labels for our products.

Since products are being reformulated and retested all the time, please refer to our website for the latest Prop 65 status and warning labels if any are required.
